

Audit Services

Audit & Review Prep, Done Right

Clean Books. Clear Direction.

Clarity in the chaos. Confidence in your numbers.

Whether you're facing an audit, preparing for taxes, or just cleaning up the books, Blazej brings structure, speed, and strategy to the process. We don't just flag issues—we help you fix them, fast.

- Reduce stress with clear roles and next steps.
- Know what's working (and what's not) before auditors do.
- Stay prepared with consistent, audit-ready reporting.
- Simplify auditor handoff with organized, clean records.
- Spot issues early with proactive financial reviews.
- Focus on growth while we handle the back-end cleanup.

Defined Scope

Know exactly what's being reviewed, who's involved, and what success looks like before we begin.

Financial Confidence

We dig into your data to trace material entries—no guesswork, no gaps, and no surprises when the auditors show up.

Actionable Fixes

You'll get a clear map of what to correct, how to correct it, and who's handling each step. You can do the work, or we can do it with you.

Clean Documentation

We package everything in a format auditors and CPAs expect—organized, labeled, and easy to review from day one.

Smart Audit Prep for Growing Companies

What We Actually Do (And Why It Works)

Our 5-step framework gives you a clean, reliable path to audit readiness.

- 1 Define the Scope**
What kind of audit is this? Are we prepping for taxes, outside auditors, or internal use? Do you want us to just diagnose problems—or fix them too? We align on outcomes up front so everyone's clear on what success looks like.
- 2 Understand Your Business**
We start by understanding how your company operates—how you make money, what systems you use, and who owns the books. This helps us audit in context, not in a vacuum.
- 3 Pull Historical Data**
We use what's already there to speed up the process. That means pulling prior audits, reviewing your most recent tax return, and checking if AJEs have already been posted. We'll also identify questions or risk areas flagged by CPAs in the past.

- 4 Review Controls & Test Entries**
We evaluate your internal controls—what exists on paper and what's followed in practice. We trace revenue and expense entries for completeness and consistency. We verify that journal entries are reasonable, correctly posted, and well-documented.
- 5 Deliver Findings + Action Plan**
We compile what's working, what's not, and what needs to happen next. You'll receive a clear action plan, with responsibilities and timelines. And everything is packaged in an audit-ready format that's easy to share with your CPA or auditor.
